

CENTRUM SOUND

PORTABLE PA SYSTEM

ChatterBox-PRO

UHF Wireless Portable Voice Amplification system

The ChatterBox is a compact single channel UHF wireless rechargeable PA system suitable for crowds up to 150 people. For larger crowds, additional wireless speakers may be added. With a weight of less than 6 lbs, the wireless speaker and transmitter is easy to bring around from room to room or out in the field. Supplied with both a hand-held microphone or body-pack transmitter, the operator has a choice to suite every application. The body-pack is equipped a volume control to compensate for varying speakers voice levels. After a days work, just plug it in and let it recharge 4-6 hours for up to 8 hours of complete wireless operating time.

The system also feature a wired microphone input with separate volume control for proper balance between wireless and hard wired microphone (hard wired microphone should not be used with multiple wireless speakers). In addition, the

ChatterBox features a line in (mini-jack) for playback from CD or cassette as well as a mini-jack output for recording applications.

The standard system is supplied with one wireless speaker and charging transformer, one hand-held

microphone transmitter, one body-pack transmitter with headset microphone, and one charging cradle. Wireless microphone transmitters may also operate on AA size alkaline batteries. Optional equipment includes Centrum Sound's MS7700b tripod speaker stand with stand adaptor.
