

DLR 50

Digi-Wave™ Digital Spread Spectrum

The DLR 50 is a portable receiver capable of receiving digital modulated signals up to 100ft outside and 200ft inside from DLT 100's. Operating on the 2.4GHz ISM band the DLR 50 has a high resistance to RF interference and can be used in most countries around the world. It can operate up to fifteen channels simultaneously when used in one way system application.

An LCD displays channel of operation and low battery status. All controls are on the front panel and also provide access to change set-up.
